# Globally Recognized Avatars
**SlideWiki supports <u>Gravatar</u> for using *Globally Recognized Avatars.***

Your Gravatar is an image (based on the email you have registered with in SlideWiki) that appears next to your name when you contributed slides/decks, comments, etc. Avatars help identify your contributions on SlideWiki.

*\* In order to set your avatar, you need to register your corresponding email address (which is used by SlideWiki) at the <u>Gravatar</u> website.*

# Remote control for presentations

- SlideWiki allows to sync the display of a presentation on several devices, for example, a presenter PC/notebook and tablets/smartphones of people in the audience

- If the presenter switches slides, so will all the devices, which follow the presentation

- Once you play a presentation, a QR code together with a short link will be displayed and can be shared with other users

- Users who open the link will see the presentation as you are playing it so any change in slide is immediately reflected in other users browsers

- This feature can also be used as a remote control for your presentation, when you play the presentation on your smartphone and open the respective link on the presenter PC

# Search and Replace

- Users can search within a deck content by clicking on the search icon on top of the presentation tree and entering their desirable search keywords.

- Users (when logged in) can select "**Find and Replace**" feature from the context menu by right clicking on nodes in the tree.
